

# THE CONSTRAINTS STUDY AREA

In order to achieve the scheme aims, a broad study area is being analysed. The study area forms a roughly rectangular area, running from Derry to Aughnacloy.

The extent of the study area has been selected to enable a wide range of scheme options to be considered from the outset of the assessment. Furthermore it enables the impact of any proposed new works to be seen in the context of the surrounding natural and built environment.

The study area is shown on the adjacent map:
